

U.S. Geological Information Sources

As the Nation's largest water, earth, and biological sciences and civilian mapping agency, the U.S. Geological Survey (USGS) provides reliable, impartial scientific information to describe and understand the Earth. The USGS offers to customers data and information on the quantity and quality of the Nation's water resources, on natural hazards, mineral and energy resources, and the environment. The USGS also provides information on the status and trends of biological resources and ecological factors affecting living resources.

In 1995, the USGS began to undertake some dramatic changes to meet changing scientific needs of the Nation. The new USGS incorporates minerals information specialists from the former U.S. Bureau of Mines and biological expertise of the former National Biological Service, complementing traditional strengths in mapping, geology, and water resources.

Natural Science Information

The USGS Earth Science Information Centers (ESIC) offer nationwide information and sales services for map and natural resources information products. The ESIC's provide information about geologic, hydrologic, cartographic, and biologic topics. A full array of digital data and information products is also available in a variety of formats. Visit the USGS World Wide Web home page for an exploration of the earth and biological sciences. <URL: <http://www.usgs.gov/>>

The USGS, in cooperation with State agencies and universities, coordinates a national network of State ESIC's that provide State and local information about natural science products and services.

Many of the State ESIC's, along with a network of retail stores, sell USGS products.

A list of State ESIC's can be obtained by calling 1-800-USA-MAPS or by visiting the ESIC World Wide Web home page <URL: <http://mapping.usgs.gov/esic/>>.

A list of retail business partners for each State can be obtained by calling 1-800-USA-MAPS or by visiting the USGS Map Dealers home page <URL: <http://mapping.usgs.gov/esic/usimage/dealers.html>>.

ESIC's can fill orders for custom products such as aerial photographs and orthophoto quadrangles, digital cartographic data, and geographic names data.

ESIC's can also provide information about natural science materials from many public and private producers in the United States by using online information retrieval systems.

For further information, contact or visit any of the following ESIC's or call 1-800-USA-MAPS.

Anchorage-ESIC
4230 University Dr., Rm. 101
Anchorage, AK 99508-4664
Phone: 907-786-7011
Fax: 907-786-7050
E-mail: gfdurocher@usgs.gov

Denver-ESIC
Box 25286
Denver, CO 80225
Phone: 303-202-4200

Map Sales

Use the information below to obtain free map indexes and catalogs, and to order topographic maps or any of the wide variety of thematic maps available from the USGS:

USGS Information Services
Box 25286
Denver, CO 80225
Phone: 303-202-4700 or
1-800-HELPMAP
Fax : 303-202-4693

Book Sales

To order USGS book catalogs titled "Publications of the U.S. Geological Survey" (catalogs include references that date back to 1879) and all technical reports, books, popular science publications, and posters, use the address listed below:

USGS Information Services
Box 25286
Denver, CO 80225
Phone: 303-202-4700 or
1-800-HELPMAP
Fax: 303-202-4693

To order USGS open-file reports, contact:

USGS Information Services
Open-File Reports
Box 25286
Denver, CO 80225
Phone: 303-202-4200
Fax: 303-202-4693 or
303-202-4188

To get on the mailing list for the free catalog, "New Publications of the U.S. Geological Survey," send your name and address to the following address:

USGS New Publications
903 National Center
Reston, VA 20192
E-mail: pburnworth@usgs.gov

It can also be accessed through the World Wide Web at <URL: <http://pubs.usgs.gov/publications/>>.

For More Information

Receive information from the EARTHFAX fax-on-demand system, which is available 24 hours a day at 703-648-4888.

The address for the USGS World Wide Web is <URL: <http://www.usgs.gov/>>.
